

Disaster Vulnerability Reduction Project
Grenada Resettlement Policy Framework and Environmental Management
Framework Documents

In 2011 the Government of Grenada secured funding from the World Bank to finance a Disaster Vulnerability Reduction Project. A prerequisite for obtaining funding for the Project was the preparation and publication of these documents: a Resettlement Policy Framework (RPF) and an Environmental Management Framework(EMF) taking into consideration the World Bank's Policy guidelines on Resettlement and Local Laws and procedures to ensure that the project takes social concerns into account.

The Government is now seeking an Additional Financing (AF) to would permit the completion of priority activities under the RDVRP as well as new activities. To this end, the RPF and the EMF) is being updated as a precondition to secure the AF.

A draft copy of the Resettlement Policy Framework and the Environmental Management Framework documents are now available to the general public for feedback and comments. Public responses could be made electronically and by mail at the following addresses:
